

FOR IMMEDIATE RELEASE

Visual Evidence/E-Discovery Partners with Innovative Legal Technologies LLC to Increase National Presence.

CLEVELAND, Ohio, February 1, 2010 -- In response to on-going national requests, Visual Evidence/E-Discovery today announced the formation of a strategic partnership with Innovative Legal Technologies.

Visual Evidence/E-Discovery (VE), headquartered in Cleveland, finalized their partnership with Innovative Legal Technologies (ILT), based in St. Louis, on October 15, 2009. ILT will now be the sales agent for VE in St. Louis and surrounding areas.

VE and ILT have similar missions -- to serve clients in the legal sector by offering E-discovery services. Both companies are poised to benefit. VE will now have access to ILT's client roster; and ILT's clients will enjoy VE's tier-one technology and state-of-the-art E-discovery solutions.

"The partnership was a natural one," Manfred W. Troibner, principal and Director of Marketing for Visual Evidence/E-Discovery, says. "We expect that ILT's presence in the St. Louis market and their business relationships will enhance our exposure and broaden our customer base."

Innovative Legal Technologies displays a similar enthusiasm for the partnership.

"This partnership is going to propel E-Discovery services to a new level in the St. Louis legal market. ILT's clients will continue to receive our unmatched customer service and experience in litigation technology while gaining the benefit of Visual Evidence's incomparable expertise and processing capabilities," states Ms. Lori Bregenzer, an owner at ILT.

About Visual Evidence/E-Discovery

Visual Evidence/E-Discovery (www.vevidence.com) is an owner-operated, tier-one entity that was created to provide law-sector clients with electronic-discovery services. Their facility houses the Forensic Center, Imaging Center, application development staff, a trial services department, and a sales and management department. The majority of their clients are large law firms and corporate legal departments. Their client base extends to more than 3,000 firms and individual litigators.

About Innovative Legal Technologies

Innovative Legal Technologies was founded in 2003 as a legal software training and consulting company. Since then, the company has developed strong working relationships with many clients and is a trusted resource for litigation support solutions in St. Louis, MO and its surrounding legal community.

In a push to become one of the region's premier, full-service litigation technology providers, they expanded their service offerings

in 2008 to include document imaging and its ancillary services. The response from clients has been tremendous. And thusly, ILT has become a leading provider of reliable, turn-key litigation technology solutions while remaining the "go-to" company in the area for expert knowledge on litigation support software and best practices for complex matters.
